Bailick Blinds & Shutters Ltd.

Automatic Sliding Doors

Bailick Blinds & Shutters have installed over 350 automatic door units nationwide. From hospitals and pharmaceutical plants to retail units and car show rooms, we have the experience to automate all types of doors.

Bi-part, single sliding, 2 and 4 leaf telescopic doors, panic break-out and curved doors are the most common doors used by our clients.

Thanks to our flexibility, we have been able to diversify the traditional use of automatic doors and satisfy the most demanding clients. Our range of products also now includes fire rated automatic doors and hermetic sliding doors for hospitals, pharmaceutical and semi-conductor industries.

We install and commission automatic door operations for all the national aluminium companies, supermarket chains and individual retailers.

Revolving Doors

We supply and install high quality revolving doors with eye-catching features. It's unique design combines architectural beauty with the highest degree of flexibility. From saving energy costs to the use of intelligent safety features, every aspect of this revolving door is designed to optimise the needs of our customers.

Fast Action Doors

User Safe- They have a flexible, durable, lightweight curtain that operates in side guides.

Crash Forgiving- The curtain has the ability to resist the forks of most material handling devices.

Self Repairing- If the curtain is hit, the door is immediately released from its side guides and automatically resets itself after an opening cycle, without showing any damage.

Tightly Sealed- The door completely seals the opening, forming a perfect barrier against draft, humidity, noise, dust, light, birds, and insects - allowing for perfect production conditions to be maintained.

Wind Resistant, Traffic Compatible & Low Maintenance

Roller Shutter Doors

Roller Shutters have a proven track record for the most diverse range of openings. Used for the commercial & industrial sector, it offers a high security and user friendly solution. Available in manual and electric, and with a standard galvanised finish. Available from a range of PVC or powder coated finishes.

Insulated Roller Shutters and Fire-Resistant Shutters are also available.

Insulated Sectional Doors

These doors are supplied complete with all panels cut to size and springs, tracks and hardware ready for site assembly and installation. All motors come complete with a pre wired built on starter. It is the duty of the client to have an insulator provided close to the motor. Doors available in both manual and electric operation. All electrically operated doors come with a manual override as standard.

Steel Doors

Personal Steel Doors by Bailick offer superior quality, performance rated steel doorsets and a comprehensive range of compatible ironmongery.

Steel doorsets are widely used in commercial, education, transport, retail, sports & leisure, scientific, health and pharmaceutical environments.

Trelli-Doors

These grilles are primarily designed for use by the retail industry where confined headroom within a shop prevents the use of conventional roller shutters. They provide the general public with maximum visibility of shop window displays outside normal working hours whilst protecting the goods on display from theft. They are also ideal for use in doctor's surgeries, Pharmacies and residential properties.
